

Precalculus Summer Assignment 2022
Due Date: First Day of Class

Welcome to Precalculus! The purpose of this summer assignment is to review material that you already learned in Algebra 2. If you struggle with specific areas of the review, you should use your past from Algebra 2 notes, Khan Academy, and other resources to ensure that you understand the concepts before our first day of class. Please do not wait until the last minute to complete this assignment. You will want to pace the assignment out over the summer so you are prepared to begin Precalculus in the fall. The majority of the assignment should be completed without a calculator, although there are few sections that you will need to use a calculator. Please plan to purchase a TI-83 or TI-84 for class.

This assignment will count as your first homework grade (graded on effort). The assignment is located under "Assignments" on Albert.io. Login information for Albert.io can be found on our Google Classroom page. Our Google Classroom code is [wyenewm](#). The link to the Albert.io assignment can be found [here](#).
